

FNQRRC TRACK DAY CLASS

Open to all capacities of motorcycle. This is a **NON-COMPETITIVE** class for riders wishing to have a ride around the MakoTrac and improve their bike skills without having to race. All machines must have mirrors removed, headlights & indicators taped & side stands secured and will be scrutineered prior to entering the track. Riders must have the same protective equipment as race classes, i.e. one or two-piece leathers. Riders will also have to attend a riders briefing. Bikes will be let onto the track one-by-one and passing of other riders is only allowed along the straight sections not coming into or around corners. Riders will be given a ten-minute session on the track. The pace of riding will be limited to no faster than 1min 10sec. This is 4-5 seconds slower than the fastest road race bikes lap times. Times will be monitored and you will be black flagged for going too fast. Any rider riding aggressively or at excessive speed will be black-flagged and may be excluded from further participation. Any rider entered in this class will not be able to enter another race class at that meeting.
